Summary

AI & Data Engineering undergraduate at IIIT Kota (2024–28) with hands-on experience in developing full-stack AI applications, machine learning models, deep learning systems, and data analytics solutions. Proficient in C++ and Python, with practical experience in TensorFlow, PyTorch, computer vision, and data-driven problem solving. CodeChef 2-Star rated with 150+ DSA problems solved across LeetCode, CodeChef, and GeeksforGeeks. Passionate about building scalable software solutions and leveraging AI and analytics to solve real-world problems.

Education

Indian Institute of Information Technology (IIIT) Kota <i>B.Tech in AI & Data Engineering (AIDE) CGPA: 7.1</i>	2024 – 2028 <i>Kota, Rajasthan</i>
BPR International Public School, Kurukshetra (CBSE) <i>Senior Secondary (CBSE Class XII) — 88%</i>	2023 – 2024 <i>Kurukshetra, Haryana</i>
Mahant Prabhat Puri Girls Senior Secondary School (HBSE) <i>Secondary (HBSE Class X) — 94%</i>	2021 – 2022 <i>Kurukshetra, Haryana</i>

Technical Skills

Languages	: C & C++ (Proficient), Python (Intermediate), JavaScript, SQL
ML & DL	: TensorFlow, Keras, PyTorch, Scikit-learn, OpenCV, Hugging Face, CNN, LSTM, RNN, Transfer Learning
Full-Stack	: Next.js, React, TypeScript, Tailwind CSS, REST APIs, Vercel
Tools	: Git, GitHub, Jupyter Notebook, Google Colab, Kaggle, VS Code, Microsoft Excel

Projects

- Violence Detection in Videos** | *TensorFlow, Keras, CNN, LSTM, OpenCV, Python* [GitHub](#)
- Engineered a CNN–LSTM pipeline for real-time video violence detection; achieved **~89% validation accuracy** on 500+ labeled clips — LSTM temporal modeling outperformed single-frame CNN baseline by **~15%** on F1-score.
 - Designed modular, scalable architecture separating feature extraction (CNN) from sequence modeling (LSTM); built custom OpenCV preprocessing pipeline reducing validation–train accuracy gap by **~12%** and validation loss by **~18%**.
- AI Personal Ops — Goal to Action Plan Generator** | *Next.js, TypeScript, Gemini API, Vercel* [Live](#) | [GitHub](#)
- Built a production-grade full-stack AI web app; architected clean REST API layer with separation of concerns between frontend, API routes, and AI inference for a scalable, low-latency streaming experience via Google Gemini API.
 - Implemented multi-model fallback across 3 Gemini models for high availability; engineered persistent goal history, follow-up Q&A, and PDF export pipeline — end-to-end ownership of a user-facing system.

Positions of Responsibility

- Camera Lead** — Neon Cinematics, IIIT Kota **Aug 2024 – Jun 2026**
- Led visual production for 10+ campus events; managed a 5-member crew and cut pre-shoot coordination time by **~25%** via a standardized production workflow.
- Video Editing Lead** — Fit India Club, IIIT Kota **Aug 2024 – Jun 2026**
- Produced 20+ promotional videos; improved average video reach by **~35%** through engagement analytics with 100% on-time delivery across all campaigns.
- Social Media Lead** — Paryavaran Shakti, IIIT Kota **Aug 2024 – Jun 2026**
- Grew club following by **~40%** in 6 months; managed end-to-end content pipeline for 30+ environmental awareness campaigns.

Achievements & Certifications

- Summer Analytics Program** — **IIT Guwahati** (Machine Learning & Data Science) — Completed structured 6-week program covering EDA, data visualization, and Python-based analytics. [Certificate](#)
- Tata Group Virtual Experience** — **Forage** (GenAI-powered Data Analytics) — Real-world business problem solving and AI-driven insights simulation. [Certificate](#)
- SQL and Relational Databases** — **IBM Skills Network** (Cognitive Class, DB0101EN) — Covered relational model concepts, five core SQL statements, advanced SQL syntax, and join operations with hands-on exercises and assessments. [Certificate](#)
